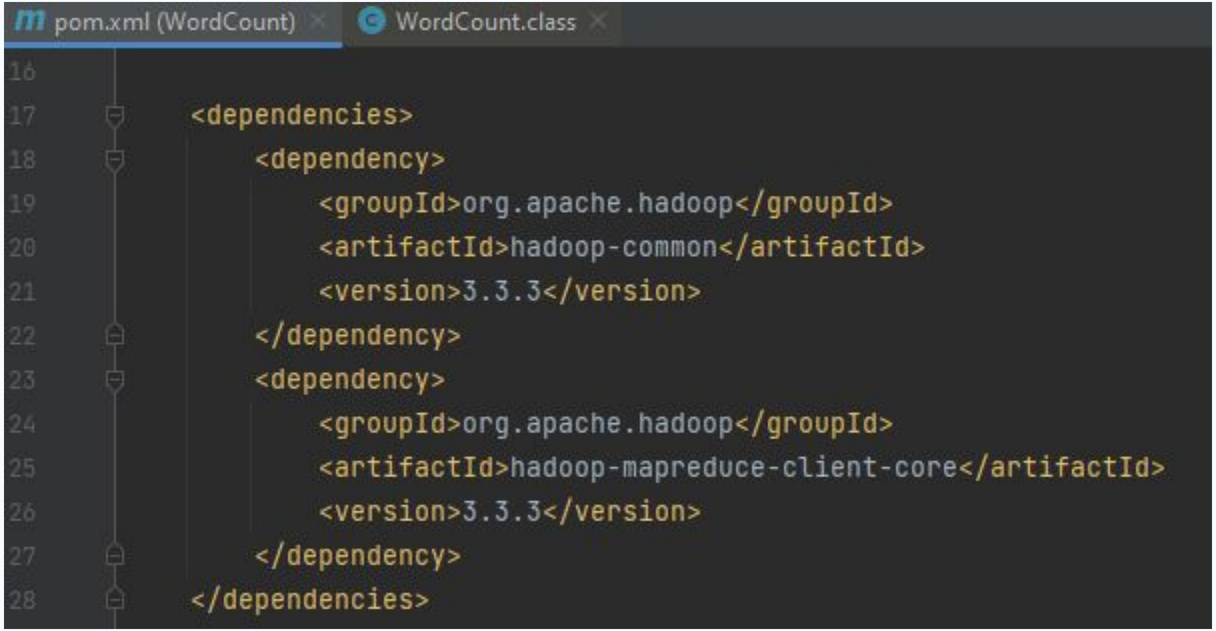
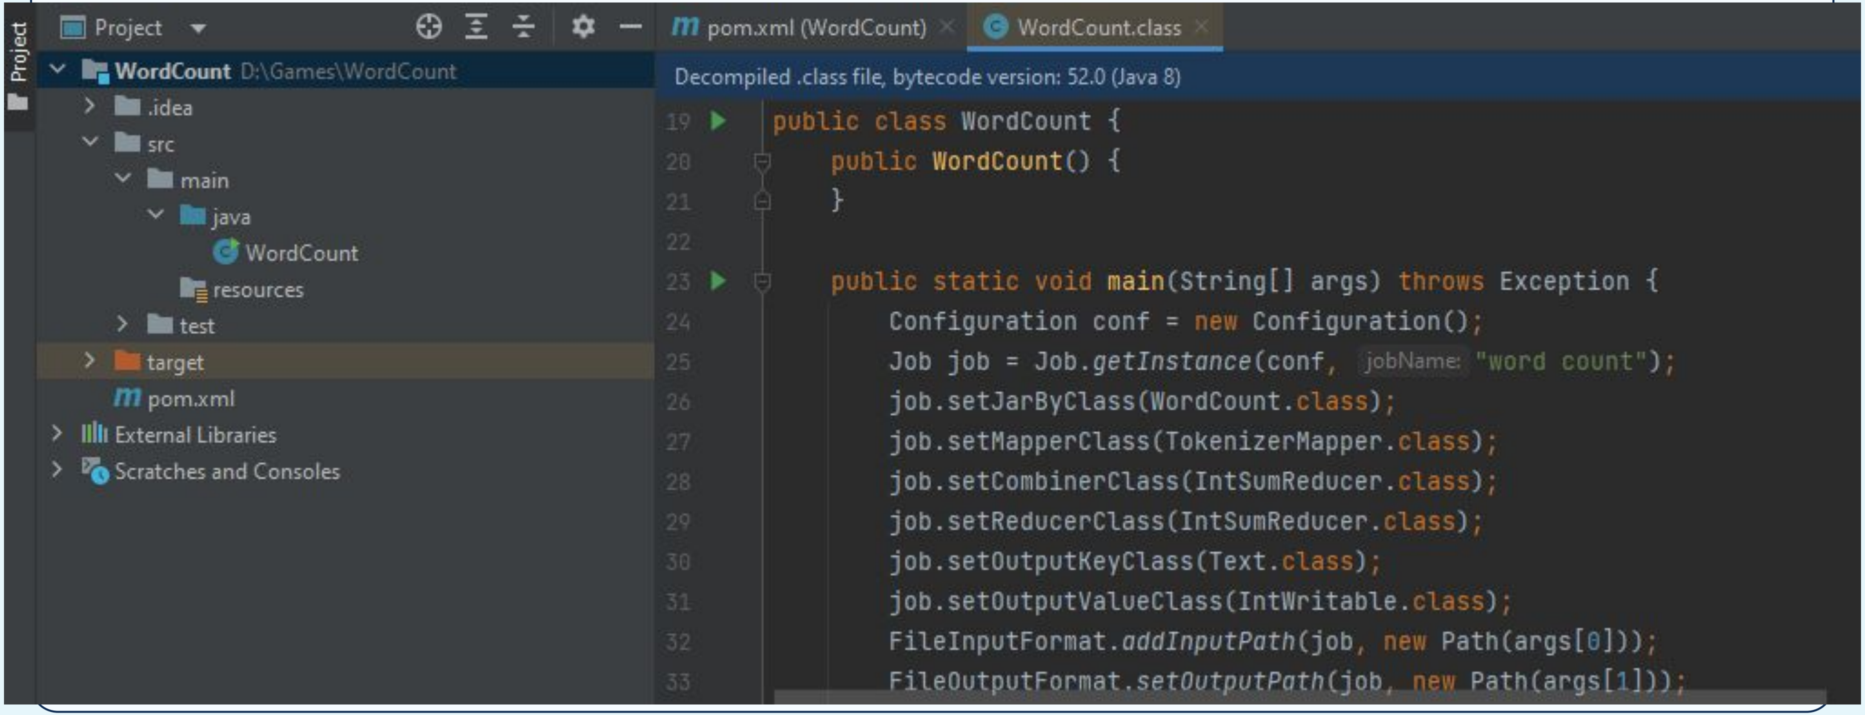
WordCount Setup in Hadoop



```
<dependencies>
    <dependency>
        <groupId>org.apache.hadoop</groupId>
        <artifactId>hadoop-common</artifactId>
        <version>3.3.3</version>
    </dependency>
    <dependency>
        <groupId>org.apache.hadoop</groupId>
        <artifactId>hadoop-mapreduce-client-core</artifactId>
        <version>3.3.3</version>
    </dependency>
</dependencies>
```

WordCount Setup in Hadoop

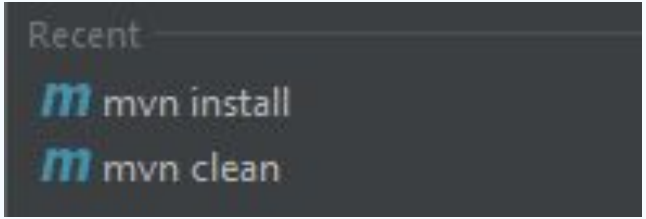


Decompiled .class file, bytecode version: 52.0 (Java 8)

```java
public class WordCount {
    public WordCount() {
    }

    public static void main(String[] args) throws Exception {
        Configuration conf = new Configuration();
        Job job = Job.getInstance(conf, jobName: "word count");
        job.setJarByClass(WordCount.class);
        job.setMapperClass(TokenizerMapper.class);
        job.setCombinerClass(IntSumReducer.class);
        job.setReducerClass(IntSumReducer.class);
        job.setOutputKeyClass(Text.class);
        job.setOutputValueClass(IntWritable.class);
        FileInputFormat.addInputPath(job, new Path(args[0]));
        FileOutputFormat.setOutputPath(job, new Path(args[1]));
```

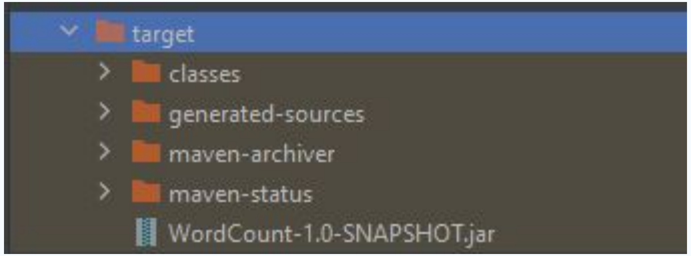
WordCount Setup in Hadoop



Recent

- mvn install
- mvn clean

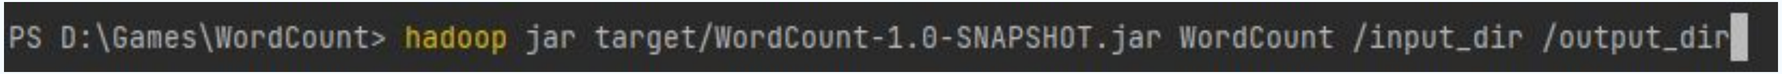
Create Jar using maven



```
target
  > classes
  > generated-sources
  > maven-archiver
  > maven-status
    WordCount-1.0-SNAPSHOT.jar
```

hadoop fs -mkdir /input_dir	Membuat folder input pada HDFS
hadoop fs -put /path/to/file.txt /input_dir	Meletakkan file text ke folder input HDFS

Menjalankan jar



```
PS D:\Games\WordCount> hadoop jar target/WordCount-1.0-SNAPSHOT.jar WordCount /input_dir /output_dir
```

Analisis

Berdasarkan hasil runtime word count yang diperoleh dari file dengan ukuran 1Mb, 10Mb, 100Mb, 500Mb, 1Gb, dan 10 Gb, dapat dilihat bahwa untuk melakukan word count dengan menggunakan hadoop memerlukan waktu yang cenderung lebih banyak dibandingkan dengan yang tidak menggunakan hadoop, dengan bahasa pemrograman Java. Hal ini dapat dilihat dari grafik yang dihasilkan, yang mana runtime untuk melakukan word count dengan hadoop selalu lebih besar. Jadi, file size yang diuji tidak menentukan kecepatan dari runtime yang dilakukan untuk word count tersebut. Hal ini disebabkan karena Hadoop memiliki overhead yang menjadikannya tidak cocok untuk file size kecil melainkan hadoop ini jauh lebih cocok digunakan apabila data yang diatur nya memiliki file size yang sangat besar.

THANK YOU
